
FT: AU/WW My Euro for your Octatrack

Posted by spbaker - 2013/09/09 22:34

The Elektron bug has bit and I'm shrinking my modular to move to an A4 & Octatrack combo.

This is a selection of modules I'd like to trade for an Octatrack, not looking at splitting them up or selling just yet.

The list is:

Tiptop Audio Z3000 MKII
Harvestman Hertz Donut Mkl
4MS Pingable Env Generator
Makenoise Moddemix
Blue Lantern Diode Filter
Manhattan Audio Mix

This would be a killer first set up for someone wanting to get into the Modular world. I can supply a 84hp rack & rails but you'd have to sort out power for them.

If there is something in there you'd like to swap out I have a few other modules, we can negotiate

I have plenty of good trader references on Muffs and eBay and there are a few people on here who can vouch for me.

Happy to chat and discuss.
