## Eventide space for sale or trade for Ableton push

Posted by a julia set - 2013/09/13 22:02

---

Hey guys, I'm looking to sell off my Eventide space in order to facilitate the purchase of an Ableton push.

As much as the space sounds insane i find its a bit too big and intrusive for a lot of the stuff iv been doing recently and i end up just using Spx-90 impulses in the box and get an instantly acceptable result.

Its an awesome accompaniment to the octatrack or any other elektron gear due to its midi implementation and the quality of the algorithm allows for rapid automation of its parameters with very few artefacts. It really gives you that early noughties warp sound a la squarepusher.

Im based in manchester uk and if your local your welcome to pop round for a look.

Id Like 350 for it or Il happily do a straight swap for an ableton push.

Il post within the uk for free.

Cheers.
