I will ship anywhere for extra money. Not looking for trades unless you have a DSI Tempest or Prophet 08 (maybe other Analog Poly), I also have other stuff not up here that is possible for those trades (MP-201, MF-108m). I may add a Boss RC-50 looper, debating that, hit me up if you are interested because that may sway me.

Moog stuffs first

Zoom SB-246 includes power supply, this is super easy to program, fun, and the sounds HIT on this little feller. \$80 pp gift please, shipped in the CONUS

Boss DR-202 includes power supply, MINTY, then Jungle, DnB and Rock beats on here are fuckin rad. \$120 pp gift please, shipped in the CONUS

Odds and Ends

Atari 2600 w/Synth Cartridge and 2 keypad controllers-Awesome, Weird, Unique...Put the Cartridge in the slot, turn on, use the pads to play melodies, beats, arpeggios, etc. Run it through your pedals into OCTATRACK for SUPREME OVERLORD. \$140 pp gift please, Shipped in the CONUS

Here is a video:

Yamaha G-50 pitch-to-midi converter-In nice shape, works well, WAY BETTER THAN ANY ROLAND. Made by Axon and branded as Yamaha. I have video examples if you want to see it in action controlling a synth with a bass, which is harder to convert than regular guitar. I don't have a Hex pick-up but that does make it polyphonic.

\$175 pp gift please, shipped in CONUS

On some of the sounds the attack is set slow on the synth. But see how low latency is at the start of the video.
