## Ambient with MD rhythm: Dormant

Posted by encym - 2013/09/02 17:44

---

Hi All,

This is a new ambient guitar piece. The perc coming in is MD, as you might have detected anyway.

Here ya go:

Nice songs, specially thrown out of a MD UW+.

The more I use my MD alone the more I fell that each elektron is a complete music station which can make a whole song by itself without "comboing" it with another. More simple direct'n effective.

Nice work again!

Mathieu

I agree -- it feels liberating to work on just the MD and leave the computer switched off.

Unlike my recent tune Schimmer (where all was played on the MDUW, see <https://soundcloud.com/encym/schimmer>), everything but the percussion is done in Ableton for this tune.

For anyone who enjoyed this, do check out the latest upload:

<https://soundcloud.com/encym/infinite-skies>

Thanks!

Lovely track, possibly my favorite so far in this series, all of which I've enjoyed.

Is this one guitar samples in the MD played by hand again, or some different setup?

Thank you!

That was done in Logic, from before I had the idea of taking it all into MD territory.

With samples played via Kontakt, I believe.
