_____

Hi, ive been sneaking around on this site for a little while. And just recently joined the community.

I have tried to upload a mp3 ive made, but it doesnt work. I get no error message. It just goes to the download main page.

I?m on a Mac with firefox. Any suggestions or restrictions i dont know of?

Thanks alot
Thomas

Hi Thomas,

There shouldn't be any restrictions. Should just be, :

Go to 'Downloads'
Click 'UPLOAD
Chose the File
Select the appropriate category for your file
Add a description and SUBMIT

If you've don the above and still have difficulties, I'm at a loss. I just ran a test upload with the above directions and it worked fine. I did this on a Mac, testing on both Safari & Firefox with no problems.

Please, email me at: actuel (at) gmail com or AIM me: actuellife
if you continue to have problems.

Thanks,
actuel

I tried with Safari, and it worked. Strange.

I?m on OSX 10.5 and Firefox 2.0.0.9. That combination might be the reason.

I cant load my MP3 into the sound examples either. I am getting some sort of mime error.

Errors Returned While Uploading
MIME type not allowed: application/octet-stream
