Wha-wha-what?
Where'd it go? :silly:

I was gonna comment on eminor9's excellent cover of (Forbidden Colors) Merry Christmas Mr. Lawrence :laugh:
anyways, it's the sh*t!!

Yeah, as noted in the Version 2 thread, currently there's no commenting on files. I'm hoping to add the functionality soon
though.

Comments is now working. I just installed this added component that gives us this functionality. To add comments just
click 'Details' and presto comment away!

I have posted a test comment here (Click Details): http://elektron-
users.com/index.php?option=com_docman&task=cat_view&Itemid=30&gid=14&orderby=dmdate_published

I still need to theme the new component and work with it a bit but the functionality is there. Plus, it cost me money...so
you better like it! :laugh:
