## My SPS1-UW was delivered -> NOT!

Posted by Acidfever - 2005/05/25 12:53

---

OMG!

UPS left a little card in my mailbox: No answer, next delivery date: Thursday 25th of may. Now i have to wait untill tomorrow!!!!!! My GF was at home but she was gone for like 15 mins to get something from the store.

How do they do it?

:cry: :cry: :cry:

I need some happy words people!

This btw, always happens to me!

Bel ze even acid... Dan hoor je wanneer ze langs komen en dan kan je gelijk klagen over dat er niks over op het briefje stond... Die van mij komt vandaag pas aan in zweden.

//dutch mode off

## Re: My SPS1-UW was delivered -> NOT!

Posted by arp1618 - 2005/05/25 13:36

---

My heartfelt condolences. My UW was supposed to be arriving today also but when i contacted UPS they said there was a delay because my package got left in a container on import to the UK. Luckily they have recovered the package and it will be with me tomorrow. Moments of panic and the anticipation is building.

T.

/dutchmode on

Er stond wel dat ze langs waren geweest enzo. Maar ja, daar heb ik nu niks aan.

/dutchmode off (again)

T.

Well i guess we will both receive it tomorrow then. Can't wait.....!!!

How did you know it should arrive today btw? By the tracktrace thing or did you get some sort of notice?

It would have been better to have it tonight though....ah well.

Posted by arp1618 - 2005/05/25 13:56

---

I phoned up UPS to find out when it was going to be delivered. I've phoned them three times since Elektron dispatched my UW on friday. I think i'm maybe a bit anxious.

T.

Posted by arsey\_rob - 2005/05/26 12:43

---

how long have you had to wait? from sending it off, to being delivered.

i've got some gigs coming up so i'm reluctant to send it off till they're out the way

=====

### Re: My SPS1-UW was delivered -> NOT!

Posted by Acidfever - 2005/05/26 13:17

---

Wurd, i received the UW! Can't use it yet since i'm @ work though. ARGHZ!

To answer the previous question. I ordered mine at the beginning of last week (16th of May) and they tried to deliver it yesterday. So i'd say 9 days all in. They only shipped it last friday though. So the real time for it to get here was 5 days (i live in Holland btw).

Notice i did not get the upgrade but purchased a new SPS-1 UW!!!!!!

=====

---

Good luck tonight ;)

=====

## Re: My SPS1-UW was delivered -> NOT!

Posted by - 2005/05/26 17:11

---

Ok, playing with it right now. Patterns banks A - C really use a lot of ROM samples and i have to say it really extends the sound of the MD.

Where the demo patterns of the normal MD are really cool, this makes this thing a monster. Phat BD samples, weird industrial sounds, you name it. The 32 preset samples are actually pretty good to my ears (although most of 'em not really samples you would normally use in a song). They could have made more work from the demo patterns themselves. But hey, it's only demo's anyways.

This is just after 10 minutes of playing though.

I'm off for some more fun l8rzzz

=====

## Re: My SPS1-UW was delivered -> NOT!

---

Would have been nice if the sampledump utility was available on the website like the manual says it is.

Will have to look for another way to dump the samples in there.....

=====

## Re: My SPS1-UW was delivered -> NOT!

analog?

=====

## Re: My SPS1-UW was delivered -> NOT!

---

Posted by Acidfever - 2005/05/26 19:21

---

milkmansnd wrote:  
analog?

That's only possible with the ram machines. (Ram machine are very cool btw). The ROM machines are loaded though midi sample dump.

=====

**Re: My SPS1-UW was delivered -> NOT!**

Posted by milkmansnd - 2005/05/26 19:39

---

huh - you can not save them into the ROM or edit them in the MD?

edit: or resample internally?

=====

**Re: My SPS1-UW was delivered -> NOT!**

Posted by Acidfever - 2005/05/26 19:44

---

milkmansnd wrote:

huh - you can not save them into the ROM or edit them in the MD?

edit: or resample internally?

Don't think so, but that was pretty clear from the specs as far as i am concerned. The ROM machines are kinda like E12 machines. New fule for the MD.

The RAM machines are realtime recordable en you can resample the output (and also pre-listen what you recorded).

Maybe you can analog record but i just think this is not the way it works.

=====

## Re: My SPS1-UW was delivered -> NOT!

Posted by Acidfever - 2005/05/27 00:10

---

Yessir!

Here is a MP3 recorder from the 1st Demo song. Hope i don't make Elektron angry with this!

EDIT: I cannot see the file, can any of you?

=====

## Re: My SPS1-UW was delivered -> NOT!

Posted by glaive - 2005/05/27 00:20

---

There is a problem with the upload tool where it doesn't redirect to a 'success' page upon completion. Upload the file and go get a snack. When you come back, the file should be uploaded.

This redirect issue is next on my list of things to fix.

=====

## Re: My SPS1-UW was delivered -> NOT!

---

What parameters does the new rom-machines have? Somehow I've thought that they don't have decay parameter at all, just the hold-envelope. :-(

I would miss the decay, since I find it a must for the snarerolls, and adjusting drumhit lenghts to the tempo. Decay is also very cool for making variations for different snare and hihat hits.

=====

## Re: My SPS1-UW was delivered -> NOT!

It has decay, no worries. The 8 Loop ROM machines also have endless decay at setting 127. It does what it says: Endless decay. If a sound doesn't stop playing due to this setting yuo can press stop twice to make it stop.

I am @ work now so can't check the other parameters but i remember they include sample start and stop position, the repeat thing is also there (2 parameters), Pitch off course, SRR (Sample rate reduction) and some other thing i can't remember atm.

Basicly the parameters you have with the E12 machines.

=====

Posted by Acidfever - 2005/05/27 10:47

---

Ok, demo song 1 upload retry #2.

Hope this works out now.

NOTE TO ADMINS: FILE UPLOAD DOES NOT WORK!!!!

Tried it 3 times now and nada happens.

Ok new file available in the downloads section under "Machine UW". Or check this direct link:

<http://www.elektron-users.com/modules/wfdownloads/visit.php?cid=29&lid=44>

Have fun.....

Lol, stop saying such stupid things. You can't judge a machine on demo's!!!! Obvoisly you don't have the experience to see that.

Also did you know you can actually change the samples?? So if you don't like cheese you can change it, lol

GRrrrr :-o

GRrrrr :-o

I don't have any use for it because I own the esx and triton also my pc software has battery wich is way better than the MD. who fuck cares bout retrigger when I can do that shit with what I got. Also those demos do sound like the Fresh Prince hahahaha!! :lol:

=====

### Re: My SPS1-UW was delivered -> NOT!

It's funny how people tend to say gear they allready have beats something they haven't even tried yet.

Ok you have the non-upgraded MD, but i think you will be surprised on the possibilities in this thing.

I for instance was always sceptical about the possibilities on the normal MD before i just decided to buy one and find out what it could actually mean in my setup.

This sampling upgrade did the same for me as buying the original MD. It's great and i think it will help me get even more out of the box.

Agreed an ESX is great fun too...but different beast alltogether.

Now stop judging stuff on demo's and judge the machine when you have the chance to play with it for a while.

For starters i think you will be very impressed with the AM machines. Oh yes! :-D

I briefly owned an ESX because some of the demo patterns where exactly to my liking but in real life it didn't deliver what i was looking for.

So respect people that decide to buy the upgrade or a new UW and just use what you have if your happy with it.

Man, it's not a contest of any kind..... I'm not saying the ESX is a sucky machine too am i? It's just not the sollution for me at the moment.

What do these particular demo's tell you about the music style you can use it for?

Nada! Exactly. It's just a short demo of some of the things you can do with it. It's not like you have to program a similar sounding pattern with it or something.

Cheesy old school rap sounding is the sound Elektron chose for the demo. Has nothing to do with the machine itself.

I don't get your point....really....

Nope.....it can hold 32 fresh new samples in memory.

24 normal ones and 8 with the possibility for endless decay so u can make looping samples.

=====

The sample dump utility is not done yet (just received an answer on my support call).

But weird since they mention it in the pack of A4 papers they call temporary manual. (Yes the manual for the UW aint done yet aswell (though they offer to send it to you when it's done)).

SO now i am using wavelab to dump them. Works ok.

We really don't need your comments or stupid remarks. A forum is used to exchange information and healthy opinions, not reading your stupid chit chat. This is a topic about the MD-UW, this is not a topic for you to inform us how you think of the demo's and such. (I for one really don't care about your comments)

If you really want that go make a topic in the "im very important, listen to me!!!" or in the "i suck and i don't know what to post but i just have to" forum.

Grrrr....

Back OT: 32 should be enough :P is the 23 sec for a sample mono time of stereo??

=====

Well, yes and no. I agree that having a nice colletion of samples ready is very cool. But also remember that the RAM machines also need memory to record. So a full memory would mean non working ram machines.

I guess you can load a wav-file of multiple hits on one machine and use the start and stop for scanning which hit you would use. :-D

Ha ha, you are a genius! That also makes it possible to use different parts of a loop you have loaded in the MD, great! I wonder how precisely you can define the start and stop points. I have my MD in for the upgrade now and can't wait to get it back!!!

Hi forum btw :-D
