
MD encoder broken

Posted by Tobi - 2005/06/18 09:59

One of my MD encoders simply disappeared.
Some bloke must have broken it of and removed it afterwards.
Has someone else ever experienced this problem?
Can it be replaced without too much work if I send the MD in for UW-Upgrade?

I found it.
the encoders seem to be fixed with glue and the glue-point just drained.
so it was no problem to repair it, works perfectly.
