## A couple of sysex files

Posted by eminor9 - 2008/04/19 07:06

---

Doing some back ups and thought some might find sysex files for tracks made solely with Monomachine interesting:

1. song + pattern + kit of No Hooks (listen in MnM examples) - a good exemple on how to use song mode (contains different lenghts/offsets and transpositions) - tweak filter base for the filtered drums during intro
2. song + pattern + kit of Mono's Merry X-mas Mr Lawrence - just load and enjoy
3. song + pattern + kit of the remix of 2. This contains interesting reverb/gating on the Ensemble Wave pad - adjust pitch on drums during the breaks.

Hope you enjoy.

Now where's my free T-shirt :cheer:

Edit : all those files were made using OS 1.07 version.
