
Transpose Chart for MD-UW

Posted by Toni - 2008/04/29 00:01

Couple of weeks ago I did the paper of MnMs DigiPro-waves. I presume everybody has printed it and put it on their wall. If not yet, go fetch here!

After you have memorized the DigiPro-waves, you can start to learn Transpose Chart for MD-UW. Get it right here:

Transpose Chart for MD-UW.

If you send your samples to UW in the key of C, you can easily transpose them with this chart. Obviously everyone already knows this, but the chart makes it easier to discern. And besides, everybody needs something to put on their walls. :laugh:

(I Got the idea from Swiw.)

sweeeeet!

you'll see a pic of my studio soon, guess what'll be hangin' on the wall in the background :lol:
