
Slow it down

Posted by Allerian - 2008/05/12 11:24

Inspired by the words of fellow Elektron user Syncretism, I was experimenting with running the MnM at 120 bpm and the MD at 80 bpm when it hit me: Simultaneously turn the tempo and the pitch knob of a Ctrl-AL machine down slowly. Up is quite fun as well. :silly:

Then try hitting that pitch knob with a strong LFO and get wild with the tempo dial. :blink:
