
MNM arpeggio/miditracks

Posted by Mesak - 2005/07/04 20:15

hey, have you experienced oddity while using arpeggio on internal seq AND midi tracks at the same time?

i feel there's something strange going on if you try to use arpeggio on, say track 3 and set a arpeggio for midi-track 3 aswell... there's somekind of interference, speed will be the same for both or something...?

please check! i'll try to get more out of this too.

... oh yes and this has been in 1.05a, perhaps in earlier OS already. will dump the 1.05c tonight and try with it.

peace

Can you list the steps that are necessary to cause this behavior? You might want to upload the pattern you are using as an example.
