"6000 cycle": (sps-1uw demo track)

<http://www.elektron-users.com/modules/wfdownloads/singlefile.php?cid=29&lid=76>

all sequencing is on the MD, including 2 midi machines.

it's a little sparse but the idea is there. let me know what you think...sorry about the crappy ROMpler sounds, I am tone-generator-challenged at the moment.

I enjoyed this - really fucking punchy drums! The rompler kinda gives it this like mid 90's aesthetic - I don't mind, but I can see where you'd want a modern synth in there or something. Even so - good work!

I liked the crappy ROMpler sounds. Nice and crispy overall! Post more, man ...
