
MD + MM + Revolution + 303 Devilfish Live Set

Posted by crixmadine - 2005/07/19 00:13

FreqModif recently did a dub-techno/acid live set in Boulder, Colorado using an MD, MM-sfx60, Revolution and a TB-303 with the Devilfish mod and no laptop. The set has been posted in four parts:

FM Live Part 1
FM Live Part 2
FM Live Part 3
FM Live Part 4

The setup utilized the Elektron Console configuration.

The set was all pattern-based sequencing with some on-the-fly programming.

Thanks for listening. :)
nate + freqmodif crew.
