:pint:

nice track! How much sid emulation were you using?

thats what I thought :P

Its just the perfect electro sound. I just had a sesh with my midibox SID - rebuilt it, made it better - and I realize that there is no substitute for the real thing. I like the emulator on the monomachine - but man, the SID kicks its ass across the room. However, the emulator and the SID will play nice together, I can just tell.
