hey, thanks, justin!

every time i sit in front of these two machines, i have to ask myself if maybe they \*do\* make it too easy. =P

Wave World is just awesome. I saw them at Electro-Music 2005 in Philadelphia. Nice guys. They are working on a new DVD. When it's done, I'll let you know. Rolf, their graphics guy, just makes killer stuff.

Nice track, by the way ;) Do you have more stuff in this vein?

i'd like to see them sometime; i'm on that mailing list with gert, and he just seems like a really cool guy.

thanks for the kind words, glaive - i've got tons like that - it's a sound that comes pretty naturally with elektron kit, i think.
