
MY FIRST MONOMACHINE SONG

Posted by feraillus - 2005/08/27 04:01

Hi freaks!

here is my first track using mainly the MONOMACHINE =)

Crappy live recording but lot of fun with this amazing gear!

cool song - but man, that recording is weird to listen to - you have all of the percussion panned to the Left and most everything else panned to the right.

Also - what the hell format is that? Luckily Audacity will open the file... I would sum it to mono, and export it to MP3, and post it here on the site ;-)
