## MD-UW first steps

Posted by synthy - 2005/09/17 21:26

---

Here's a quick loop I made in Project 5:

[http://users.adelphia.net/~synthy/original\\_loop.mp3](http://users.adelphia.net/~synthy/original_loop.mp3)

And here's what happened when I transferred it to the MD-UW, used a few ROM machines, and added a little bit of MD percussion:

[http://users.adelphia.net/~synthy/md-uw\\_loop.mp3](http://users.adelphia.net/~synthy/md-uw_loop.mp3)

Not alot of work put into this, just a quick demo of what the MD-UW can do. :-D

hey friend, what do you mean "???" im prety sure synthy was trying to show us how he could manipulate the loop with his UW, dont discourage people from posting things like this on the board, we elektron users love sharing soundbytes.

Hi Watson,

Thanks for your support, but it's not necessary. I am not, discouraged by useless comments. I would not waste a minute more of yours or my time on Friend's response, unless Friend can remove his/her hands out of his/her pants and type something of meaningful intelligence. :-D

does this mean you're ready to come over for a jam session?

:-D
