
MidiNes

Posted by watson - 2005/09/25 03:44

does anyone know if there is a company that makes a MidiNes type box and jsut sells it built, i dont want to rely on an old nintendo from a flea market and have to use a sequencer to make all the sounds, basically i want somthing simlair to the SIDSTATION but with the nes sounds. i know there isnt going to be anything as good as the sidstation, but as long as it has some knobs and buttons with a little lcd screen thats cool with me. hope someone has seen somthing like that.

i already asked this:

http://www.elektron-users.com/modules/newbb/viewtopic.php?topic_id=432&forum=2

to my knowledge this is the only one out there and it never was finished.

(PS. i'll reply to your PM's in later tonight)

why not use a seq and a cheap old 'tendo?

the midines kicks ass - I have one! I know!
