## Science Lab SL01: Collaboration

Posted by papertiger - 2008/10/02 06:08

---

Below are the pairings for the new science labs. The rules are simple: collaborate with your partner to create a song on the elektron machine you've been assigned to using ONLY that machine. No post processing, no external processing, no external controllers (wesen, I'm looking in your direction!), no external sequencing, no nuthin' -- just a straight recording into your computer and bounce to mp3. Also, only one entry per pairing.

**\*\*EDIT\*\*** Entries are due on Jan. 20, 2009 in mp3 and sysex format.

**\*\*EDIT\*\*** Please submit the sysex, the recorded mp3, and any samples you might have used. Since the files section can only host files up to 8MB in size, anything larger than 8 MB will have to be hosted off-site.

Good luck and have fun!

---

SID:

On the Fly and BATNI

Ural and Enapa

MD SPS (non UW):

Kas and Ipassenger

Radam and Future Image

Note: Weâ€™ve confirmed that the sysex of MKI machines will work with MKII machines and vice versa

MD UW MKI:

Merlin and Monofever

Ural and Allerian

Neonleg and Hageir

How Dragons Disappear and Test2

Emnine and Koshimazaki

Wesen and Glitched

Relapse808 and Enapa

On the Fly and Konkrete

MD UW MKII:

Your Mama and Bdotodotx

**\*\*EDIT\*\*** Opuswerk and Tib (formerly MeMeMaMo and Tib)

Papertiger and Lamarcp

Black with Ants/Stylinghead and Swiv

Mvmono and Alex Hasten

Noiselab56309 and Earsmack

Actuel and Test2

EuphoricDream and Nick the Zombie

**\*\*EDIT\*\*** Odlarn and Previewlounge (new addition)

Mono MKI:

On The Fly and Allerian

Monofever and Glitched

Paants and Relapse808

Tib and Ural

Wesen and Emnine

Enapa and Hageir

Human Koala and MVMono

Mono MKII:

Papertiger and Swiv

Konkrete and How Dragons Disappear

Black with Ants/Stylinghead and Actuel

Noiselab56309 and Merlin

Hesse and Your Mama

Monofever and Thomas

Radam and Alex Hasten

## Re:Science Lab SL01: Collaboration

Posted by actuel - 2008/10/02 07:13

---

thx PT.

Just so folks know we're starting over in our count for the Science Labs. The lab counts have gotten uneven over time. For example, the MNM would be #04 and the MD #02, etc. Kinda confusing.

For now on, they'll all follow the same number and the same start and end times, whether people enter or not. So we're starting at SL01. The naming scheme prefixed with SL so we can differentiate from og labs labeled as #01, etc.

=====

correct. just the machines. that's what the science labs have been about -- to force us to learn the elektrons. it'll be fun. .  
. promise. but it might hurt a bit. =)

---

So, for mnm mkII users, is there any restriction on uploaded waveforms? Should we stick with the stock digi machine waveforms or anything goes as long as its in the box?

@ yourmama

Boku wa ganbarimasu. Hajimemashou!

---

## Re:Science Lab SL01: Collaboration

Posted by papertiger - 2008/10/02 13:15

---

Hesse, you could load your mama in there if you want to -- sky's the limit.

Same goes for the UW -- go nuts!

---

## Re:Science Lab SL01: Collaboration

Posted by mvmono - 2008/10/02 13:54

---

Just to be totally clear.

1) Internal processing is okay?

2) The only restriction is which synth you use eg. mono, md and not individual machine within a synth eg. vo, swave, trx etc.?

---

## Re:Science Lab SL01: Collaboration

Posted by drxcm - 2008/10/02 14:24

---

This is gunna be fun...:woohoo:

Quick question - does the .syx have to be a piece in song mode or just a pattern. Might be hard to collaborate on jamming out / recording a single pattern, thats all...

Now to find my partner ..

---

## Re:Science Lab SL01: Collaboration

1) Internal processing is okay?

Yes. and highly recommended.

2) The only restriction is which synth you use eg. mono, md and not individual machine within a synth eg. vo, swave, trx etc.?

right -- the restriction this time is just using the one elektron machine. and possibly your collaborator, depending on how one sees it. =P

---

---

## Re:Science Lab SL01: Collaboration

---

daswesen wrote:

omg great. but why no external controllers!? i feel naked at the MD without being able to control the delay! omg omg omg this is such a heartbreak.

external controllers would give people an unfair advantage and the goal is to be challenged by using just the machine. naked you shall be, wesen. so you might want to think about not stickcamming this one. . . not sure though, that might be \*someone's\* kind of thing. . .

as for the heartbreak. . . time heals all wounds. you'll live.

:kiss:

---

ural wrote:

is multitrack recording for SID Station ok? or just - one, internal SID sequence can be used for one song?

this is a good question, one i would have never thought of because i don't own one...(sadly)

SID will be the exception, multitracking is ok for the SID collaboration. Still needs to be SIDs only, no extra processing, etc. Same rules but you can multitrack.

=====

Hopefully folks will find ways to work that's best for them both. Just remember you'll want to capture as much of the tweaking, filtering, etc in the machines. that way you can send the Sysex to your partner and they can add, edit and make even more patterns, etc. Doing all real time tweaks and recording direct to a DAW isn't going to be make it very collaborative at all because you're partner is relying on your mix down and not your actual patterns, song, etc.

Again, do whatever you guys want, but remember aside from the SID there's no overdubbing or external processing.  
PIMP YOUR BOX.

---

Hey, I'm wondering how you guys are working together?

Are you passing files back and forth and remixing?

I'm interested.

By the way, a great way to do things, besides emails, is by setting up a drop @ <http://drop.io> .

Just upload whatever, add notes, delete...anything. Very collaborative.

=====

## Re:Science Lab SL01: Collaboration

Posted by tIB - 2008/10/09 10:49

---

^ Nice link, hope it turns out to be more reliable than my mediamax (which erased an entire set of drum samples I downloaded of this site which I can no longer find anymore).

So far Ive just been working on the one collab (sorry mememamo, soon!), mostly emailed concepts and sysex passing around so far. Working on patterns/kits so far, taking a half and half approach to the kit and then working our own ideas into each others patterns.

Have come up with plenty of different ways of working and am keen to put in a lot to these labs; theres a lot to get out of this in terms of looking at different peoples approaches to kits/programming.

Really enjoying it so far and looking forward to getting my MD one going too, bags of fun!

=====

## Re:Science Lab SL01: Collaboration

Posted by glitched - 2008/10/09 11:30

---

Yeah, agreed. This was actually a great idea. Different than working with audio though--you really have to plan things out.

As for drop.io, I wouldn't call it rock-solid, but I don't think it's going anywhere. Some have complained about speed, but they were in the outskirts of Europe and I think most of these servers are in the US. Anyway, the interface is great and so easy to set up.

=====

## Re:Science Lab SL01: Collaboration

Posted by tIB - 2008/10/09 13:03

---

^ Nice, Ill check it out; if its small files like sysex and notepad stuff then its not going to take long to upload anyway. Thanks for that.

As for the planning out aspect one thing I'm sure going to miss when using MD is the super copy function.

We didn't take OS versions into account when we made the pairings. That's an issue you'll have to sort out with your partner in crime. Differing OS' might be what your problems are due to.

Hey, I'm just wondering how people are doing with this.

Anybody close...or even started?

My partners seem to be a little busy at the moment, but I'm sure they'll check in soon.

How are you working?

=====

## Re:Science Lab SL01: Collaboration

Posted by papertiger - 2008/10/23 10:37

---

i've started both. the method has been to trade sysex's back and forth, and save a new version of the kit in case either person wants to go back to a previous version.

i think the most important thing is to be systematic about things and to make it easy -- pick one bank or several banks (depending on how you work) and agree to wipe it!

what exactly is science labs for .. music, patches .. collaboration with visualz?

=====

## Re:Science Lab SL01: Collaboration

Posted by papertiger - 2008/12/24 22:05

---

previewlounge wrote:

what exactly is science labs for .. music, patches .. collaboration with visualz?

Science Labs are typically "challenges" to create a song/sketch/piece using a very limited set of parameters on either the Machinedrum or the Monomachine. For instance, in the past, we had a Science Lab which consisted of making a song using just the noise machine on the Monomachine. Usually, no external processing or external anything is permitted -- it's just you, the elektron, and one synth machine.

This time around, for SL01, we tried something we've not done before: collaboration between forum members. Pairs/teams are allowed to use the elektron and that's it -- no external processing, etc.

Visuals are not part of the science labs. Science labs are a chance to explore the machine in a really focused manner.

If you're interested in sharing patches, etc. I would post in the sandbox forum -- just make sure that you include an explanation.

Hope that explains things.

M

PS welcome to the board!

Where should completed projects be sent?

---

## Re:Science Lab SL01: Collaboration

Posted by emminor9 - 2008/12/30 17:08

---

One practical question while we're here.

Is the intention to submit each contributor's take or file or do the collaborators have to agree on one single take ?

Personally, I think it would be interesting to see/hear both sides but maybe that's just me.

could be interesting to see both versions. because those are really different at least in our collaborations...

---

## Re:Science Lab SL01: Collaboration

Posted by papertiger - 2008/12/30 22:42

---

I think it's an interesting idea, Eminor, but to me the point of the collaboration is to see the end result of two people working together on one song. I will speak with Actuel and see what he thinks, but for purposes of the Science Lab, I think it should be one submission from the collaborators. We can start another alternate takes thread so that this one doesn't become overloaded.

---

Others should feel free to chime in if they feel differently.

Allerian -- I'll also ask Actuel about your question.

M

=====

## Re:Science Lab SL01: Collaboration

Posted by papertiger - 2008/12/30 23:53

---

Allerian wrote:

Where should completed projects be sent?

Projects should be posted in the files section.

Please submit the sysex, the recorded mp3, and any samples you might have used. Since the files section can only host files up to 8MB in size, anything larger than 8 MB will have to be hosted off-site.

Eminor9

Is the intention to submit each contributor's take or file or do the collaborators have to agree on one single take ?

Yes, collaborators must agree on one take. If you want to post your separate versions, please start a new thread in the Science Lab forum with an appropriate title.

The deadline has been extended through January 20, 2009.

Thanks!

M

Tib is now paired with Opuswerk.

Raphael, I would have paired you with Tib since you were first in line, but Tib signed up for an MD MKII slot, not SPS. Hopefully someone will show. If not, we may have some dropouts before the deadline. Of course, there will be other science labs!

Sid Station Collaboration now up in Files section

Batni & OnTheFly - A Sid

MP3 file and syx Rar here

=====

---

## Re:Science Lab SL01: Collaboration

Posted by ural - 2009/01/10 23:48

---

Here we go with collaboration between Enapa and me - "Hail From Farm".  
Everything done by multitracking SidStation in Logic. No eq, no processing - just levels and pans.

From the beginning there was concept to make something with Sid in anthem genre.

Please see and listen where we ended up...

Sysex folder is placed in "Files" section.  
MP3 you could listen and download at <http://virb.com/ural>

Comments are welcome!

yours,

ural

thanks for participating, ural. but please, for your other collab, and for others who have yet to turn in their submission, the mp3 should just be a straight recording from the stereo pair of whatever machine you're using. I think the rules for the SID were a bit different given the machine's sequencing limitations (cant remember off the top of my head).

im such a noob with all the cool things going on ..  
hoping to get involved.

i was planning on doing a big video mix and projecting it on the wall, and filming with the Ex1, whilst doing realtime video overlays for big shout-outs to the other person involved, and maybe a video linkup via messenger and a simple screen capture plugin for quartz composer.

=====

M

Yes. for sid rules was different!!!

we discussed that topic with Actuel half year ago. And there was agreement that multitracking for SID is OK.

---

Hi,

I have a little request,  
Can you tell, when you upload a sysex ; the song , patterns and kit who are used to make it.  
It would be easier to load it after.

i'm very intrigued by the Stockholm Syndrome :woohoo: wanna send an eye on this ! (yeah this expression exist in french)  
good work guy's

=====

## Re:Science Lab SL01: Collaboration

Posted by tIB - 2009/01/15 07:05

---

Stockholm syndrome- song 13, kit 13,14,15, e5-9... Or at least it was when i sent it back.  
Make sure you back up- Its the devils work! ;)

=====

## Re:Science Lab SL01: Collaboration

Posted by Allerian - 2009/01/15 08:31

---

You can of course restore to a specific location. :cheer:

=====

## Re:Science Lab SL01: Collaboration

Posted by tIB - 2009/01/15 08:51

---

^ Id tried this when exchanging patterns but it conflicts with song mode- song mode still plays the steps/patterns it's programmed to while the patterns it is supposed to be playing are stored elsewhere.

=====

## Re:Science Lab SL01: Collaboration

Posted by emisor9 - 2009/01/15 17:18

---

Koshimazaki and emisor9 collab MDUWMKI mp3 and syx file uploaded.

Just used MD internal machines + RAM machines moulded in song mode.

=====

## Re:Science Lab SL01: Collaboration

---

tIB wrote:

^ Id tried this when exchanging patterns but it conflicts with song mode- song mode still plays the steps/patterns it's programmed to while the patterns it is supposed to be playing are stored elsewhere.

really? :(

lot of my backups of MnM are just "song+kits+paterns". and i don't know exact place numbers of paterns...

it seems, that when i'll try to pump some sysex of old song back to MnM the results will be very inspiring, unusual and human... :)

=====

## Re:Science Lab SL01: Collaboration

Posted by tIB - 2009/01/15 20:19

---

If you don't specify where it goes fine- I was forcing the kits to be in one place whereas songmode was looking elsewhere... I guess if you specify song number but not pattern number it would be fine.

Can be quite interesting positioning a totally different set of patterns into a different songs pattern location though...

=====

## Re:Science Lab SL01: Collaboration

Our Collaboration between Peregrin and I

<http://virb.com/humankoala/music/albums/79831>

this is the trax made with sfx60 for me and sfx6 for peregrin

for the process :

sound design and draft at start by Peregrin and me

selection

Some PingPong pattern between Peregrin and me

And the song was built by Peregrin ( i'm not very good in arrangement on the mono )

so here the result ;)

HK

## Re:Science Lab SL01: Collaboration

Posted by tIB - 2009/01/20 11:11

---

---

Unfortunately Opuswerk and I will miss the deadline for this; commitments to work/life related matters meant we only began on Friday. However, Opus has just got a couple of live sets this weekend (one with Wesen) which he needs to sort out so we're going to put it back a month and post something up here when we get it done...

Its a shame we missed the official deadline but hopefully we'll eventually get something that is a true collab (as opposed to a 'my pattern your kit' rush job) up on the site in the future.

=====

## Re:Science Lab SL01: Collaboration

Posted by odlarn - 2009/01/20 15:51

---

I hope we will finish our song today.

It's the first time workin with sysex for both of us, and it has resulted i erased tracks, total confusion etc :D But I must say that it's all been worth it, it's very evolving to work like this.

=====

## Re:Science Lab SL01: Collaboration

Posted by papertiger - 2009/01/20 18:01

---

here is Swiv and papertiger's entry into the science lab collab. i'll post the sysex later. it's fucking late. swiv hasn't heard it, he may hate it, which is why it's called the drunk tiger mix. he's more than welcome to pull it and demand a recount, redo, rewhatever. but we made the deadline yay

buh buh bu

it's in the files section

this is for the mono collateralization

MD uw mkII science collaboration track?

yes, the file area called "science labs" -- then pick the appropriate machine section.

---

this is my first time to upload a .Syx file to the science area. is it okay to include samples?

definitely. and keep in mind that you must include the samples if you want people to be able to recreate what you are submitting.

also - where do i write the javascript/php code to auto-include the mp3

i don't really understand your question. I would recommend posting the mp3 as a separate file in the appropriate science labs section. if it's over 8 MB though, you will have to host it somewhere else.

---

Cheers Emnine I well enjoyed it too. I'm really happy that we managed to find some time to do it. It was a bit tricky from both sides but we made it! :)

It made me focus on MD more, learned few tricks and I finally used song mode more then just putting 3patterns in as I usually do, all good fun!

=====

## Re:Science Lab SL01: Collaboration

Posted by previewlounge - 2009/01/25 21:35

---

---

just uploaded: mp3 "where is hundbas"

audio-only submission for science collaboration 01  
from odLarn and previewlounge

reason there is no actual song sysex file:

time factor: we both became very busy at our respective jobs  
(cool coincidence: we both work in the video field, on opposite sides of the world).

therefore i made the executive decision to upload the one mix that we have, and it is a realtime pattern-change session  
recorded through an RME fireface400.

=====

## Re:Science Lab SL01: Collaboration

Posted by papertiger - 2009/01/27 08:23

---

So I was going to post a nice index of the collab files next to the assigned pairs. . . but I realized how long it would take  
and what a PITA it would be. So if you're interested, the audio files and sysex files are in the science labs section of the  
files "tab" on this site.

i beg forgiveness, blah blah blah. . .

:)

=====

## Re:Science Lab SL01: Collaboration

Just so you guys know, I am happy to host the tracks in a subfolder here. The issues isn't hosting it's how you guys want the tracks to be presented. Flash player? Just downloads? etc.

If Allerian wants to put forth the time and efforts, it's much appreciated. In fact, I appreciate any and all who have risen to the communal cause to see this come to fruition. I just wanted to drop you all a line and let you know if there's anything I can do, I will.

^ Happy to help...

Im all for the Elektron radio running these, but only when you have the time to do it; with a download link on Allerian's site for people to access them all there shouldn't be any rush.

I just wanna hear my (our) tacks on the radio! ;)

just to mention.. virb.com provides options to be an 'artist' or a 'label'.  
their custom player gives the option to listen and also to download (or not); individual tracks can have their own settings.
