
FERAILLUS - ANOTHER MnM track

Posted by feraillus - 2005/10/20 20:57

Hi!

this pop track is essentially MONOMACHINE SID MACHINE POWERED ...

http://feraillus.maximus.free.fr/mp3z/feraillus_days_of_future_past.mp3

have a try => feedbacks are welcomed ...

Nice track! Good production. What have you used to get that nice vocoder sound?

Why can't I get a good vocoder sound out of my MicroKorg? The presets definately suck. I'm not sure how to program a good vocoder sound I guess. What do you mean run through a DP4? Digital Performer?

=====

I'm not a vocoder expert as u can listen ... lol ... but anyway i personally cut the FX of the microkorg and use a DP4 (not digital performer) to warm it up.

The ENSONIQ DP4 is a marvelous hardware multiFX.

<http://www.stanford.edu/~dattorro/DP4.htm>

=>

My opinion is : SELL your microkorg and BUY a ROLAND SVC 350 or an EMS one ... thats what i should do if i were rich =>

I like this.

Its a tad SID heavy - but I guess it had to be right?

nice work!
