
What are your top five vintage synths, drum machines, or samplers of all time?

You don't have to own them... and price is no object. What old gear do you lust after most...or cannot let go of. Let's put a 10 year limit on it... so everything has to be before 1995.

1. E-Mu SP-1200
 2. Akai MPC-60 MKII
 3. Roland TR-808
 4. Akai MPC3000
 5. Moog MiniMoog

I am too young to answer that - give me some more time, and I will be able to have more experience with more and more synths, and I will post a list.

I don't think anyone's paying attention to the time limit set by the original poster... 10 years? not even 20 will get you a tr-808! unless you're paying attention to only the period of time that you've owned them and not their relative vintage status (i.e. time of creation).

but since everyone else's ignoring it, so will I. my lust list:

- Ensoniq Fizmo
- Roland SH7
- OSCar
- Waldorf Wave

- Wiard Modular

I think he meant that it must be AT LEAST 10 years old...

personally, I don't have any experience with anything vintage. The oldest piece of gear I've owned was probably...a nord modular! :P So I must abstain.

Yes, I meant they must be at least 10 years old. Also, you do not need to have experience with the machines...just a lust for them. I have never owned any of the machines in my list...yet, I know I would love to. It is only a question...it ain't no thang.
