## Fun with Analog Delay

Posted by milkmansnd - 2005/11/09 17:06

---

<http://www.milkmansound.com/audio/analogdelay.mp3>

triggered with a 303 clone - listen to how easily analog can become madness. Incidentally - the 303 sounds outstanding through this when I am not aiming to make hell break loose too.

btw, tape delays are very cool too!

i borrowed a friends dynacord minichord which was great fun. with the feedback control and by changing the tape speed you get totally out-of-this-world effects. obviously very gritty and lofi, but that's the way i like it ;)

oops:

<http://www.milkmansound.com/audio/analogdelayfun.mp3>

left out the fun... Never leave out the fun!!!!

Sounds like fun. What are you using?

---

I've been looking for an analog delay DIY project. I'm looking for something more complex than a pedal. I wouldn't start this until I finished the projects I just started (mental promise).

yamaha E10005

scored it for \$50 a few years back - the front has been partially melted - but the thing sounds unbelievable!

is it based on tape, or is it some discrete trickery that I would never understand?

bucket brigade IC's - they are hard to find now for a reasonable price.
