Midi / Analog Performance Sequencer (MAPS)

<http://www.signalarts.ca>

I am reading info on there site that interests me.

Has anybody got one off these?...

or does does your mate have one?...

Is it really as nice as it looks?...

Well i'll see if i can find some more info about MAPS.

It looks like it would be good with CV devices. It does have some interesting features.

For the price any mpc probably has a better midi sequencer with included sampler, with live overdub/record.

but if you can midi sync this to your MPC it gets quite easy to use cv gear in your setup.

or not. whatever, i'm not into that ;)
