MnM & saving...what am I doing wrong?
Posted by moogplayer - 2005/03/18 17:55

_____

Hey all, I usually just saved new patches onto ones I didn't like, overriding them.

Just updated to 1.05 and started over with a clean slate. I noticed that banks A-B-C are filled but not D. Anyhoo, when I edit/write a new kit and save it, I can't load or assign it to a new bankm like say D1. Can someone walk me through this? I was able to save kits successfully...just can't put them where I want them, all in bank D.

_____

Hrm. Over the weekend, probably Sunday, I'll do a factory reset and see if I can replicate the problem. Would you mind listing, step by step, how you get the problem to happen?

/Scott

_____

Thanks, I'll try to do this again atonight and post my step-by step process. Something's not right either with my procedure or the update.
