
FERAILLUS - MnM + GAMEBOY track

Posted by feraillus - 2005/12/08 21:26

Hi!

here's some track made with MONOMACHINE + midi GAMEBOY (lsdj) ... instrumental version need lead solo and vocals ...

ripped with my new soundcard (is it listenable ?) ..

download me here

I loved it! I'm a huge sucker for this type of sound...good stuff. which part is the gameboy sound?

the recording seemed to be fine, although I am listening on crappy headphones and the sounds seem kind of lo-fi by nature so I'm not 100% sure.

are you the same one who posted the sid-only tunes "some of us are trapped" etc a while back? I still listen to those on my ipod... ;)

Very cool. It sounds a little lo-fi...but isn't it supposed to? It is a finished song as far as I am concerned.

love it! then again, i love all your tunes :-)

man, i've been jonesing over lsdj lately and this is not helping...

how did you MIDIfy the gameboy?

LSDJ is my second favorite music/sequencing workstation, with the monomachine as the first. i've tried software and hardware sequencers and didn't connect with em, but these two are champions IMO. i have a gamboy color and original, synced via cable.

thanx all for feedbacks!

> which part is the gameboy sound?

very hard to details but all is part mono part gb depends on the patterns ...

> are you the same one who posted the sid-only tunes "some of us are trapped" etc a while back?

i posted here some mono SID tunes but not "some of us are trapped" ...

> but isn't it supposed to?

yes it is !

> i love all your tunes :-)

thanx man!

> how did you MIDIfy the gameboy?

With the firestarter MC2 midi interface you can have a look [HERE](#)

Loved the track!

Do you mind iif I play it when I'm net DJing?

Cheers!

... and I meant to type 'next DJing' not 'net DJing.' Staying up too late on these forums... :-)

Cool track as is but I'd like to hear an update since you're talking about adding lead solo an vocals.

hello => thx!

i put a mini-lead near 50 sec ... lol ... lets call that a minor update !

download me here with a ridiculous update

the question is now : vocoder or not vocoder ?
