
tr808, ems vocoder 2000, and the best arp 2600 for sale

Posted by vibert1@yahoo.com - 2006/01/05 18:08

Losing my job soon, selling gear because I'll need money. May be interested in partial trades of machine drum uw and alesis andromeda so I can play live with a minimal setup to make some extra cash.

TR808- mint (actually perfect/as new), original japanese voltage, manual and original overlay, converted to US voltage by roland.

ems vocoder 2000- mk2 version with improved signal to noise ratio. mint with manual, awesome vocoder with vc swell, freeze, slew, and pan controls.

arp2600- orange and black with 3620. all operator's, service, schematics, and patch manuals, 2 arp latching footswitches. Perfect except some of the white writing is starting to fade. Various mods.

Email if you're interested. pics available.
