## Different knobs?

Posted by Tarekith - 2006/02/04 19:00

---

Greetings all, first post here after getting my SPS-1UW yesterday. One quick question, has anyone ever changed the knobs or the dial on the MD? While the pots and dial action are excellent, I find the smooth sides of both kind of slippery at times. Has anyone put on rubber coated knobs, or a new dial with ridges on the side?

If so, can you tell me where you got them, or what size I'd need?

Sorry if this has been asked before, searched the archives but couldn't find anything.

Thanks, and glad to be here!
