i don't need two monomachines (need is the operative word... i love them both), and i think i'm going for the more compact approach.

my sfx-6 is in near mint condition (still has plastic on display), includes box, manual, the elektron promotional sticker set (machinedrum, mono, and elektron/sid), and the 4 elektron monomachine posters (if you want 'em). probably has about 30 hours total on it since it was bought new. i've used the sfx-60 more.

\$1600 plus shipping.

i also have a waldorf pulse and gameboy color (w/light) with LSDJ for sale.

How much for LSDJ?
