dirge wrote: i don't need two monomachines (need is the operative word i love them both), and i think i'm going for the more compact approach.
my sfx-6 is in near mint condition (still has plastic on display), includes box, manual, the elektron promotional sticker set (machinedrum, mono, and elektron/sid), and the 4 elektron monomachine posters (if you want 'em). probably has about 30 hours total on it since it was bought new. i've used the sfx-60 more.
\$1600 plus shipping.
also have a waldorf pulse and gameboy color (w/light) with LSDJ for sale.
How much for LSDJ?

actually, i'm already having second thoughts about selling the little sound dj PM an offer though.
