## navigation (after all)

---

It would be nice if there were a button next to each post's subject line to jump to first unread post.

Also maybe including who started the thread with the subject?

And this is small, but it'd be nice if the same link that's on the top:

"Elektron-Users >> Elektron Forum >> Site Suggestions (1 viewing) "

were on the bottom of the thread as well (instead of just the 'Board Categories' dropdown menu, which excludes whatever sub-forum you're in currently).

=====
