
thread marking

Posted by dubathonic - 2010/04/21 01:30

I'd like to be able to mark those threads I find useful for future reference. (I can keep them in my browser's list of favorites or Delicious too, I suppose, but if it's not too much trouble...)

If this has already been addressed in another post -- or if it's already possible to mark threads and I'm too blind to have seen the feature -- your forgiveness is appreciated ;)

check the bottom of the thread, WHEN you're logged in.

there is a FAVOURITE and SUBSCRIBE choice

FAVOURITE to have available for viewing again via your profile.

SUBSCRIBE to follow the evolution of the thread, but no profile view.

if you're really into a thread do both.

peace
