_____

I would like to shorten my forum name from 'husc.sound' to just 'husc' !

I go to 'edit your details', click 'save', and get the following:

"Fatal error: Using $this when not in object context in /home/elektron/public_html/includes/version.php on line 66"

..what's up?

^^ HAHAHAHA!

I was getting fed up with mine.. Just tried changing it, but got the same message. Some PHP class seems to be problematic.

:lol:

..but, is there a solution? Maybe the moderators could change it for me?
